*\* All dates and status updates provided are estimated based on our current view at that time, but may be subject to change in the future. For example, if your premises is re-assigned to another Deployment Area over the course of the rollout. This can happen at any stage up until the network build is complete in the Deployment Area. Other unforeseen changes outside the control of NBI can impact the estimated date over the course of the rollout.*

Subject: We've an update for your area.

Hello J\*\*\*\*\*,

Thank you for signing up for updates with National Broadband Ireland (NBI).

We are pleased to confirm that the premises associated with **Eircode F42\*\*\*\*** is in the National Broadband Plan Intervention Area\* (IA), which means that once your area is ready for connection, you will have access to the NBI™ network, Ireland's new high-speed fibre broadband network.

We are actively working in your area building the NBI™ network to bring high-speed fibre broadband to your door.

**Your estimated date for connection is currently:**

**August 2021 - October 2021<sup>^</sup>**

We want to assure you that we are working extremely hard to get your area ready for connection as soon as possible. **However, dates are always subject to change over the course of the network rollout.** This can sometimes be due to required modifications in the design or build phase, necessary to ensure we are delivering a reliable, future-proofed and high-quality network to your premises.

**Got a question?**

We've created an [FAQ section](#) on our website, so you can get all the information you require on the spot.

We'll be in touch again when we have more updates on your premises.

**Kind Regards**

**The NBI team**

\* The Intervention Area (IA) is a mapped area – compiled and owned by the Department of Environment, Climate and Communications (DECC), where there are currently no operators providing high-speed fibre broadband.

<sup>^</sup> All dates provided are estimated based on our current view at that time, but may be subject to change in the future. For example, if your premise is re-assigned to another Deployment Area over the course of the roll out. This can happen at any stage up until build is complete in the area. Other unforeseen changes outside the control of NBI can impact the estimated date over the course of the roll out.
