Deputy Denis Naughten

Dáil Éireann

Leinster House

Dublin 2.

PQ 5707/22 - The number and location of hospitals with hyperpolarised xenon magnetic resonance imaging diagnostic facilities

Dear Deputy Naughten,

The Health Service Executive has been requested to reply directly to you in the context of the above Parliamentary Question, which you submitted to the Minister for Health for response.

I have been advised by the National Clinical Head of Medical Devices that hyperpolarised xenon magnetic resonance imaging technique is not in use at present with any of the MRS's that are in clinical use in the HSE funded Acute Hospitals.

I trust this is of assistance to you.

Yours sincerely,

Carol Ivory

General Manager,

Acute Operations
